Firm overview

Sterling Asset Ltd offers plan-based investment products. Deposit bands, daily return terms, contract duration, and principal treatment are published before funding. Capital moves only through the authenticated Client Area.

Clients choose a tier that matches deposit size and time horizon, then manage activity in a secure member dashboard. The control standard is the same from Novice through Advanced: accurate onboarding, verified funding paths, and official support only.

Operating model

Register, verify identity details, select Novice, Dynamic, or Advanced, then fund only through dashboard instructions. Accrual, maturity timing, and withdrawal requests stay mapped to a verified profile.

Why terms stay public

Deposit ranges, daily percentages, contract length, and principal treatment are visible before you send funds. Compare schedules against your capital horizon rather than informal promises.

Control standard

Official channels only. Sterling Asset Ltd will never request Western Union, gift cards, or personal wallet transfers outside the Client Area. Informal redirects are treated as security events.

Investment process

A repeatable path from first visit to funded plan. Each step exists so deposits, support, and withdrawals stay tied to the right client.

01	Register Create an account with accurate personal and contact details. No deposit is required to start.
02	Verify Confirm profile information so funding and support map to a verified identity.
03	Select a plan Compare Novice, Dynamic, and Advanced on deposit band, daily terms, contract life, and principal treatment.
04	Fund in Client Area Use only payment instructions shown after login. Do not send funds to personal wallets shared off platform.
05	Track Monitor accrual and maturity inside the dashboard. Raise timing questions early through official email.
06	Withdraw Request withdrawals from available balance according to your plan cycle and published rules.

Four asset desks

Diversification is intentional across distinct risk drivers. Desk coverage is not a marketing label alone.

Digital Assets

Structured digital market participation with defined plan bands, risk-aware sizing, and Client Area reporting through the full contract life.

Real Estate

Property-linked options for capital that can remain allocated through longer horizons. Clients do not need to originate or operate buildings.

Commodities and Gold

Metals and commodity exposure used to balance single-market concentration inside published plan structures.

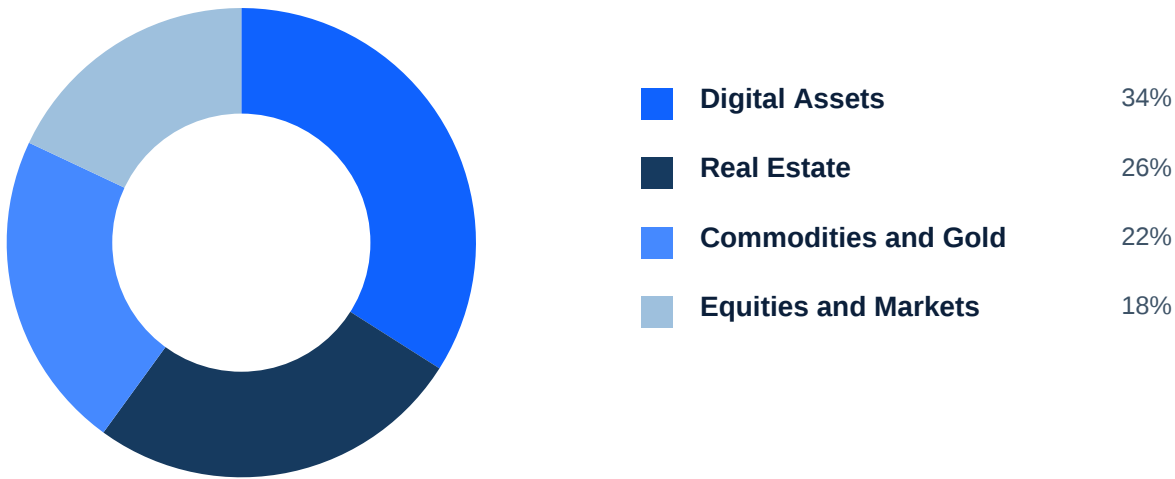

Equities and Markets

Market strategies with explicit entry ranges, duration, maturity treatment, and authenticated funding controls.

Indicative desk mix

Illustrative contribution of desks to 2025 platform activity. Mix shifts with plan demand and market conditions. Not an audited allocation.

How to read this chart

Percentages describe indicative platform activity framing for prospective clients. They do not promise a fixed allocation inside any single plan. Your funded plan follows the live schedule shown in the Client Area: deposit band, daily return terms, contract days, and principal treatment.

When comparing desks, ask which risk driver you can tolerate during the hold: digital volatility, property timing, commodity cycles, or equity market moves.

Published investment plans

Novice, Dynamic, and Advanced publish daily return terms, deposit bands, and contract life before you fund. Principal treatment is stated on each schedule.

Novice

2.50% daily

5 day contract | \$200 to \$49,999

Principal returned at maturity. Referral bonus 3%. Dedicated support.

Dynamic

3.50% daily

10 day contract | \$10,000 to \$99,999

Principal returned at maturity. Referral bonus 5%. Portfolio manager access.

Advanced

5.00% daily

30 day contract | \$100,000 with no maximum

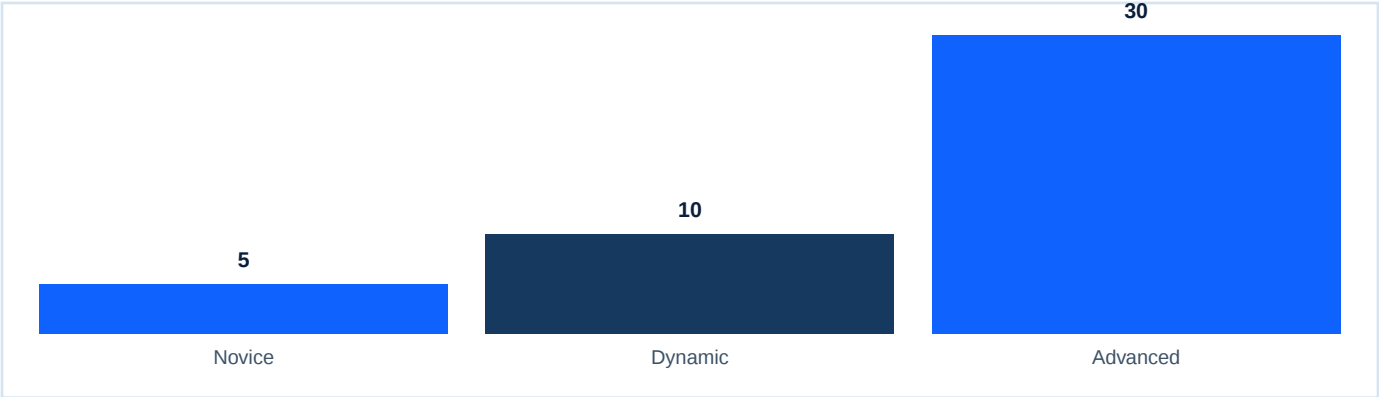

Principal returned at maturity. Priority concierge support.

Live schedules on sterlingassetltd.com/plans and inside the Client Area take priority over brochure text.

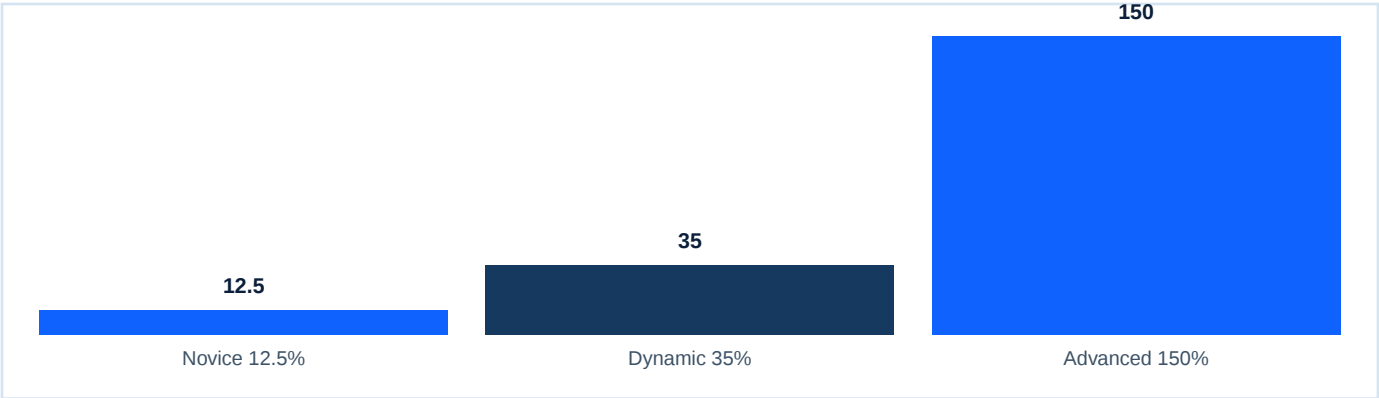

Plan comparison visuals

Contract length and illustrative total return factors for a unit deposit held through the full published term. Charts are educational. They do not guarantee outcomes.

Contract days by plan

Illustrative profit factor (daily % x contract days)

Example: a \$1,000 Novice deposit held 5 days at 2.50% daily implies about \$125 profit plus principal return at maturity under published terms. Markets and operational timing can affect realized results. Confirm live terms before funding.

Strategic MOUs

Twelve active memoranda of understanding covering settlement rails, property sourcing, metals introductions, equities research, operations, and regional support.

MOU-DA-2024-07	Digital settlement and market access framework
MOU-DA-2025-01	Digital custody process coordination
MOU-RE-2024-11	Property sourcing and due diligence desk framework
MOU-RE-2025-04	Long-horizon property allocation introductions
MOU-CG-2025-02	Precious metals and commodities brokerage introductions
MOU-CG-2025-06	Metals vaulting and logistics coordination
MOU-EQ-2025-03	Equities research and execution support framework
MOU-EQ-2025-07	Market data and desk research cooperation
MOU-OP-2025-05	Operational readiness and payments integrity cooperation
MOU-OP-2025-09	Client Area controls and escalation protocol alignment
MOU-RS-2025-08	Regional support and client onboarding coordination
MOU-RS-2025-11	Official channel communications and support coverage

Trade framing and certificates

Indicative platform volume and operational readiness credentials for prospective client diligence.

Indicative trade revenue framing

2025 indicative platform trade volume: USD 48.2 million across digital, property, metals, and market strategies. Figures are brochure indicators for prospective clients and are not audited financial statements.

Certificates and operational readiness

- Client Asset Safeguarding Readiness Certificate (internal operations standard)
- Secure Client Area Controls Attestation
- Payments Channel Integrity Checklist Completion
- Support Escalation Protocol Certification
- Onboarding Accuracy and Profile Mapping Standard
- Authenticated Funding Path Review Completion
- Official Channel Communications Standard

Awards and recognition

Citations summarised for prospective clients evaluating Sterling Asset Ltd. Recognition does not guarantee investment outcomes.

Regional Digital Investment Desk Excellence Citation 2025
Client Transparency Communication Award (industry association shortlist)
Operational Excellence in Retail Asset Access 2024
Authenticated Funding Controls Recognition 2025
Multi-Desk Client Reporting Citation 2024
Support Responsiveness Excellence Mention 2025

How to read these credentials

Certificates and citations describe process readiness and recognition referenced for diligence. They do not guarantee investment outcomes. Review live plan schedules, fund only through authenticated channels, and escalate irregular payment requests through official support.

Risk frameworks

How Sterling Asset Ltd frames process controls before allocation. Risk is never removed. Process is what we control.

Horizon fit

Contract days are matched to liquidity needs before any daily percentage is compared. Short terms do not remove market risk during the hold.

Position sizing

Deposit bands define how much capital may enter a plan. Clients size within that band rather than chasing short-term market moves.

Funding integrity

Only authenticated Client Area instructions are valid. Informal payment redirects are rejected and escalated as security events.

Desk allocation

Digital, property, commodities, and equities each carry distinct risk drivers. Diversification is intentional, not automatic.

Support discipline

Plan selection, deposit confirmation, and withdrawal timing questions stay on official email and Client Area channels listed on the website.

Maturity treatment

Principal treatment and maturity timing are stated on each live plan schedule. Clients should confirm those terms before funding.

Funding security notice

Read this page carefully before sending any funds. Most payment fraud attempts rely on urgency and unofficial channels.

- Sterling Asset Ltd will never ask you to send funds by Western Union, MoneyGram, gift cards, or personal wallet addresses shared by chat or social media.
- Valid deposit instructions appear only inside your authenticated Client Area after login, or are confirmed by the official support email published on this site.
- If anyone claiming to represent Sterling asks for payment outside the dashboard, stop and contact info@sterlingassetltd.com before sending funds.
- Each client may hold one account. Multiple plans can run under the same verified profile.
- Keep login credentials private. Sterling staff will not ask for your password.
